

PagePro 1200W and 1250W installation on Windows Vista.

Information Level:

(2 = Semi-confidential, Konica Minolta, internal use only, 3 = Service Partners/Distributors/First Line usage only. 4 = General Information, may be send to end-users.)

Printer involved: PagePro 1200W and 1250W

4

Problem description: Installing the printer on Windows Vista.

Solution / Workaround:

Before installing the printer driver for the printer on your PC, make sure the USB or parallel cable has been **disconnected** from the printer.

This document describes the installation of the PagePro 1250W. The installation of the PagePro 1200W is identical.

Unzip the downloaded driver .zip file to a location on your PC. In the example below the file has been unzipped and the folder containing the driver setup files has been stored on the desktop.

Open this folder by double clicking it.

Leave the Printer Name on the default name at this stage and click OK.

MINULIA-QMS Pa	gePro 1250W_1200
Congratulations,	installation complete.

Click **OK** on the screen above. The printer driver has been installed on you system now.

Next, connect the USB or parallel cable to the printer and make sure the printer is switched on.

Windows will detect the new hardware and the message below will be displayed at the right bottom of your screen.

Next, select Start > Control Panel.

In the Control Panel menu, select Printer.

You will see 2 printers have been added on your system.

- KONICA MINOLTA PagePro 1250W
- KONICA MINOLTA PagePro 1250W (copy1)

Right click the KONICA MINOLTA PagePro 1250W printer and select Delete as shown above.

Click Yes on the message above to delete this printer.

Next, right click the KONICA MINOLTA PagePro 1250W (copy 1) printer and select Properties as shown below.

In the Properties screen which will open now, select the Ports tab.
